- Good knowledge of Agile Methodology.

EMPLOYMENT HISTORY

Frontend Developer

ScholarshipIQ | 07/2022 - Present

- My core focus is on creating an exceptional user experience by building intuitive and visually appealing interfaces that make scholarship-iq.com application easy to use.
- I work diligently to optimize the frontend app to ensure quick loading times, and enhance responsiveness, and overall performance to provide a seamless user experience.
- I utilize my expertise in frontend development to craft clean, concise, and maintainable code that adheres to best practices, industry standards, and guidelines.
- Collaborating with my team, I actively participate in code reviews, providing feedback that focuses on enhancing code quality, maintainability, and scalability.
- I continually explore new and emerging front-end development tools and techniques to improve the overall user experience and drive innovation within the application.

Frontend Engineer

DevAngles Infotech | 02/2022 - 09/2022

- Converted design and mockups to high-quality frontend components using Javascript and the React library.
- Consuming APIs in React Application
- Implementing Firebase database, authentication, and cloud storage and hosted React application on it.
- Optimised the frontend app to increase the performance and speed of the application.
- Worked closely with the stakeholders to discuss product requirements and give updates.
- Performed code reviews to ensure proper coding conventions are followed.
- Deploying a React Applications on Google Cloud Platform (Google App Engine).

PERSONAL PROJECTS

Admin Dashboard

The Dashboard shows user details, charts, product and user can be able to navigate through the sidebar from one page to another. React admin panel dashboard was developed using React Hooks and functional components. React.js admin panel design using with Material UI, chart, and CSS.

Learning Web App

Learning App is a web application that allows users to view, and buy different courses that are on the learning platform. I used Gatsby as a starting template for React, which allows us to have different features like Router for multiple pages, GraphQL for database, Then used CSS Grid for styling.

Task Tracker

This is a task tracker app built with React that allows you to add, update, and delete tasks. It includes the react ui as well as JSON-server for our mock backend

FACE RECOGNITION

A web application for detecting faces using photos Built using React.js and API.

REAL ESTATE WEBSITE

The project 'Bami consultant' is a real estate related website made using HTML, CSS and Javascript for clients to get to know about what the company is about and their services.
